## SUMMARY

I am a determined developer with a particular passion for solving everyday problems in effective ways. Most recently I completed a full stack web development program where I specialized in Python and MEAN. I am dedicated to always learning and looking for an opportunity where I can make a meaningful contribution to a team.

## TECHNICAL SKILLS

**Programming Languages:** JavaScript, TypeScript, JQuery, Python, HTML, HTML5, es5, es6

**Frameworks:** Django, Flask, Angular, AngularJS, Bootstrap

**Databases:** MongoDB, Mongoose, MySQL, NoSQL, mlab

**Deployment:** AWS deployment, Heroku

## TECHNICAL PROJECTS

**Portfolio:** *Portfolio website site*

- Technologies Used: Angular

**Buy & Sell:** *E-commerce marketplace.*

- Built function that allows users to login and register an account
- Implemented a CRUD operation that allows customers to add, remove and save items
- Incorporated ability for users to post their own items and to browse other sellers listings
- Technologies Used: MongoDB, Express, Angular, Node

**Squishy Tomatoes:** *Movie review website.*

- Using CRUD operators for post, get and delete. You can delete each movie or each review.
- Technologies Used:

## WORK EXPERIENCE

JS Remodeling (Fairfax, VA)
